

## PHARMACEUTICAL EQUIPMENT

High quality Industry design experience, together with our fully dedicated stainless steel workshop provide our customers a 'one-stop-shop' for engineering and pharmaceutical process equipment manufacture.

# INOX

## PHARMACEUTICAL

**Q.A. Documentation that has been developed in association with Australian pharmaceutical companies.**

**Our QA documentation that accompanies the supplied equipment is tailored to cover material certification, welding traceability and qualifications, production reports, ITP's, NDT reports, and a number of various equipment tests including CIP performance, hydrostatic test, and surface finish reports (pre and post electropolishing).**

INOX are Australian and New Zealand agent for LAGARDE Autoclaves and retorts.

**INOX**  
STERILISE

Lagarde has delivered the first retorts for pharmaceutical industry in 1978. With 33 years experience in pharmaceutical applications, Lagarde has developed a wide range of solutions in the different pharmaceutical products requiring sterilisation or pasteurisation process.
